Community Sustainability Points Guidelines

If you agree to accept this award, please **send us up-to-date points on your sustainability initiatives** that we can read at the awards ceremony.

[Denver Points of Reference](#) is a good example of sustainability points from the **City of Denver, Colorado**.

If you have a link with these points, please send that to us as well.

When you have time, please fill out our [Sustainability Points Template](#) (this link is a Word Doc that can be saved to your computer and filled out).

[Sample Sustainability Points](#) is a good example of the sustainability points template filled out by the **City of Murrieta, California**.

We are creating a database of best practices for cities and would like to include your community.

We will **create a feature** out of the sustainability points template to place below your photo on our website.
